

User Story : Admin User Management

Title: Admin Review and Management of Platform Users

As a: Mavito administrator,

I want: to be able to view all registered users and manage researcher role applications by reviewing uploaded documents and approving or rejecting them,

So that: I can ensure only verified and legitimate users gain access to specialized research capabilities on the platform.

Acceptance Criteria:

1. View All Users

- **Given** I am logged in as an admin,
- **When** I navigate to the "User Management" section,
- **Then** I should see a list of all users registered on the platform,
- **And** the list should include user metadata like email, current role and registration date.

2. Promote Users to Admin

- **Given** I am logged in as an admin,
- **And** I am viewing the "User Management" section,
- **Then** I should see an option to promote the user to "Admin",
- **And** after clicking on the option, the user's role should be updated to "Admin".

3. View Researcher Role Applications

- **Given** I am logged in as an admin,
- **And** a user has applied for the researcher role by uploading a required document,
- **When** I navigate to the "Researcher Requests" section,
- **Then** I should see a list of all pending researcher applications,
- **And** each entry should include the user's details with the uploaded document.

4. Review Uploaded Documents

- **Given** I am on the researcher request list as an admin,
- **When** I select a specific application,

- **Then** I should be able to view the uploaded document in a preview or download it.

5. Approve Researcher Request

- **Given** I have reviewed a research role application and verified the document,
- **When** I click on the "Approve" button for that application,
- **Then** the user's role should be updated to "Researcher".

6. Reject Researcher Request

- **Given** I have reviewed a research role application and found it insufficient or invalid,
 - **When** I click on the "Reject" button for that application,
 - **Then** the application should be marked as "Rejected",
 - **And** the user should be notified of the rejection with an optional reason.
-

Notes/Assumptions:

- Users must upload a document in PDF format as part of their researcher role application.
- Admins have full visibility into user metadata including email, role, and registration date.
- Rejected users can re-apply with updated documentation.
- Only existing admins can promote other users to admin.
